EMBOLECTOMY CATHETER
Filed May 27, 1964

Surgeon Thomas Fogarty built the prototype catheter in his attic during medical school. Using his boyhood fly-tying know-how, he attached the fingertip of a latex surgical glove to a tube. Fogarty's simple invention pioneered live-saving, minimally invasive vascular surgery.

We'd like to see *your* great idea

Eureka Medical is a resource for busy medical professionals with great ideas for products, but limited time to pursue them. At our free, private, confidential Invention Roadshows, we'll evaluate your idea for licensing and commercialization potential for our sponsor companies. You also can participate by phone or mail. For more on our Roadshows, visit www.EurekaMed.com or call 617-794-0503. Space is limited.

Invention Roadshows

- Washington, DC,
Sept. 26-28 (TCT)
-
- San Diego, Oct. 23-25
(Neuroscience 2004)
-
- Chicago, Oct. 28-30 (NASS)
-
- Boston, Dec. 2-4 (MRS)

Chairing our expert panel of Roadshow reviewers will be Jerome H. Grossman, MD, Director of the Health Care Delivery Project, Harvard's Kennedy School. Dr. Grossman served as CEO and Chairman of the New England Medical Center and is a Director/Trustee of Mayo Clinic Stryker Corporation, Penn Medicine, Eureka Medical, among others.

Eureka Medical is an independent company modeled after leading innovation agent Big Idea Group and operating with the backing and guidance of renowned innovation expert and Eureka Board Member Professor Clayton Christensen, Harvard Business School.
